RE: Sheppard AFB, Construct Kennels FA3020-09-C-0010

To Whom It May Concern:

Unified Services of Texas contracted with Sheppard AFB on the above referenced project to construct a kennel for the Security Forces Squadron. This facility was built to house 10 specialty trained K-9 units.

UST skillfully managed all subcontractors at the jobsite. They were very flexible in making changes to the contract per government request. During the course of the contract; UST was able to keep the project on schedule. Their attention to detail produced a facility that is safe and reliable.

I was assigned as the contracting officer for this project. From the start of this project, UST was very professional during discussions. Through the course of the project this attitude did not falter. It was indeed a pleasure to work with UST and I look forward in working with them again in the future.

Sincerely,
